CIS Training Programme

2027

SECURE YOUR BUSINESS

Systematic Information Security

www.cis-cert.com

Dear readers,

as an accredited specialist in information security, CIS Certification offers well-founded trainings focusing on NISG 2026 (NIS-2) as the implementation of the NIS-2 Directive, Business Continuity, Artificial Intelligence and more. We support you in a targeted way in your professional development.

EXCLUSIVE TRAININGS FOR CURRENT CHALLENGES

Around 60,000 companies are directly or indirectly affected by the new **NISG 2026 (NIS-2) Act** and must implement all required measures by 1 October 2026. CIS Certification is a **NISG audit body** selected by the Federal Ministry and offers **brand-new trainings** for this: from the NIS-2 fundamentals seminar and the ISO 27001 & NIS-2 Training to the NIS-2 Management Training and the qualification as an independent NIS auditor, everything you need for efficient implementation is covered. The **Business Continuity Management training** according to ISO 22301 prepares participants for cyber attacks, natural disasters and crises in order to protect companies from business interruptions and damage running into millions.

EXPAND YOUR KNOW-HOW IN A TARGETED WAY! NEW AUDITOR TRAININGS WITH MODULAR SPECIALISATIONS

The new training programmes for Artificial Intelligence Auditor, Business Continuity Auditor, Data Protection Auditor and Information Security Auditor can each be combined as a specialisation – **deepen your expertise easily and modularly**. We will be happy to advise you.

ALL TRAININGS ALSO
BOOKABLE
IN-HOUSE

Sample personnel certificate

MANY YEARS OF EXPERIENCE AND INTERNATIONAL RECOGNITION

CIS Certification courses provide in-depth knowledge straight from practice. Experienced trainers show you how to implement, operate and optimise management systems and carry out audits in a targeted manner. Thanks to our accreditation according to ISO/IEC 17024, CIS personnel certificates are internationally recognised and provide sound proof of your competence. By the way: **you can book our public CIS trainings 1:1 as in-house trainings.** Take advantage of the cost savings from eliminated travel time, catering and more.

COURSE SERIES

- ISO 27001 & NIS-2 Training
- Information Security Manager according to ISO 27001
- Information Security Auditor according to ISO 27001
- Business Continuity Manager according to ISO 22301
- Business Continuity Auditor according to ISO 22301
- Artificial Intelligence Manager according to ISO 42001
- Artificial Intelligence Auditor according to ISO 42001
- Data Protection Manager according to ISO 27701
- Data Protection Auditor according to ISO 27701

SEMINARS, REFRESHERS AND SPECIAL TRAININGS

- NIS-2 fundamentals seminar
- NIS-2 Management Training
- Special training ISO 27001 and cyber security for software developers
- Independent NIS auditor
- Refreshing for IS managers and IS auditors
- Compact course on conflict management
- Compact course on data protection
- Individual trainings on request

Whether course, seminar or individual training – we have the right offer for you!

Secure Your Business!

Thomas Mann
Managing Director CIS

PS: Do not miss **THE event highlight of the year** – as every year, we usher in the autumn with the **CIS Compliance Summit** to discuss new trends, best practices and innovative solutions together with the Austrian information security and cybersecurity industry. Become part of it now:

www.cis-cert.com/cis-compliance-summit

SAVE THE DATE

The next CIS Compliance Summit will take place on 8 September 2026 in Vienna.

INFORMATION SECURITY MANAGER (ISO 27001)

JOB PROFILE

The overarching goals are identifying security risks and gaps, planning and documenting appropriate countermeasures and continuously improving the steps taken. **Information Security Managers are central contact persons and the interface between management and the operational business units.** They oversee the set-up, implementation and improvement of a process-oriented information security management system.

TRAINING OBJECTIVE: As a graduate, you know the processes and standard requirements for implementing ISO 27001 and ISO 27002 and can apply them in practice. You are familiar with the laws and regulations relevant to information security and have the tools to be a competent contact person for external legal advisors. You also know how to build, lead and motivate teams and how to implement projects successfully.

The participation fee for the entire course series including exam and certificate is € 3,690 (excl. 20 % VAT). Prices for individual courses on request.
Contact us at trainings@cis-cert.com

The ISMS standards ISO 27001 and ISO 27002: implementing and optimising information security correctly

COURSE

The fundamentals of information security as well as overarching aspects such as organisation, technology and process management are covered. Using case studies, participants are guided towards independently implementing what they have learned. In addition, the standard is compared with other approaches to information security, and possible further developments of the standard itself and of the series of standards are discussed.

DATES 09:00–17:00 each day

EXAM Information Security Manager

COURSE EXAM

The exam content relates to the modules “Standard”, “Law” and “Psychology”.

PREREQUISITES

Proof of 2 years of professional experience in information security management within the last 3 years

EXAM FORMAT

The written exam (single choice) takes 1 hour.

ACCREDITED CERTIFICATE

Information Security Manager (if proof of practical experience is missing, with the suffix “Candidate”)

VALIDITY OF THE ACCREDITED CERTIFICATE 3 years

RENEWAL CRITERIA FOR THE IS MANAGER CERTIFICATE

- Proof (e.g. confirmation by the employer, interim reference, self-declaration) of 2 years of professional experience in information security management within the last 3 years
- One CIS further training event (refresher) within 3 years

Please note that certificates with the status “Candidate” **cannot** be renewed.

BUSINESS CONTINUITY MANAGER ACCORDING TO ISO 22301

JOB PROFILE

Companies are increasingly faced with the challenge of being prepared for emergencies and crisis situations. With our Business Continuity Manager (BCM) training, **you acquire the knowledge and skills needed to guide companies safely through crises and ensure business continuity.**
This training is based on the requirements of ISO 22301 and provides comprehensive legal, organisational and psychological foundations.

TRAINING OBJECTIVE: Within 4 days, you will learn the essential elements of Business Continuity Management. The training combines theoretical knowledge, practical exercises and real-life scenarios to prepare you optimally for your role as a BCM manager.

The participation fee for the course including exam and certificate is € 3,490 (excl. 20 % VAT).
Contact us at trainings@cis-cert.com

Business Continuity Manager

COURSE

CONTENTS

- **Legal foundations:** Overview of national and international regulations, including the GDPR and IT security laws.
- **Introduction to risk management:** Definitions and concepts, risk identification – methods, risk and opportunity matrix (ISO 27005), practical exercises
- **Introduction to BCM and ISO 22301 requirements:** In-depth understanding of the standard and its implementation.
- **Crisis simulations:** Practical exercises for handling emergencies.
- **Psychological foundations and leadership skills:** Leadership in stressful situations, effective communication and resilience.

TARGET GROUP

- Managers who are to act as Business Continuity Managers.
- Employees from risk management, IT security, facility management or corporate management.
- Persons who want to prepare for ISO 22301 certification.
- Anyone interested in dealing more deeply with business continuity in the context of the NIS-2 and DORA requirements.

DATES 09:00–17:00 each day

Vienna	01. – 04.03.2027
Vienna	14. – 17.06.2027
Vienna	11. – 14.10.2027
Vienna	15. – 18.11.2027

EXAM Business Continuity Manager

COURSE EXAM

The exam content relates to the BCM course.

EXAM FORMAT

The written exam (single choice) takes 1 hour.

CERTIFICATE **Business Continuity Manager (ISO 22301)**

CERTIFICATE VALIDITY 3 years

RENEWAL CRITERIA

- One CIS further training event (refresher) within 3 years

ARTIFICIAL INTELLIGENCE MANAGER ACCORDING TO ISO/IEC 42001

JOB PROFILE

The rapid establishment of AI systems presents companies with unprecedented challenges. Those who do not use AI will have no chance against competitors in the long run. Nevertheless, artificial intelligence also poses a massive risk, especially in the areas of data protection and information security. You receive both the necessary **know-how for a secure and efficient implementation of an AI management system** and the recognition of your competence through a CIS certificate – a strong signal to customers and business partners.

TRAINING OBJECTIVE: Within 3 days, you will learn the essential elements of ISO/IEC 42001 and gain up-to-date know-how on AI management systems. You will deepen your theoretical knowledge with practical examples and carry out a risk and impact assessment in the field of AI.

The participation fee for the course including exam and certificate is € 3,090 (excl. 20 % VAT).
Contact us at trainings@cis-cert.com

Artificial Intelligence Manager

COURSE

CONTENTS

You will learn the essential elements of the ISO/IEC 42001 standard, the implementation of an AI management system as well as the legal foundations and their practical implementation. The course combines up-to-date know-how with practical exercises to prepare you optimally for your role as an AI manager. The focus is on:

Module I

Standard ISO/IEC 42001 – fundamentals and management system + risk management

- Artificial intelligence and management systems – objectives, motivation, perspectives
- AI management systems according to ISO/IEC 42001:2023
- Risk management according to ISO/IEC 23894:2023
- Impact assessment according to ISO/IEC 42005:2025

Module II

Ethics + legal foundations & practice

- Ethics in artificial intelligence and operational requirements
- Legal foundations and practical implementation

Module III

Practical examples and creation of a roadmap.

TARGET GROUP

This training is aimed at a broad target group – from career changers to specialists who want to drive forward or be responsible for the implementation of AI solutions in their company.

DATES 09:00–17:00 each day

Vienna	19. – 21.04.2027
Vienna	27. – 29.09.2027
Vienna	29.11. – 01.12.2027

EXAM Artificial Intelligence Manager

COURSE EXAM

The exam content relates to the modules “Standard ISO/IEC 42001”, “Ethics, legal foundations” and “Practice” of the Artificial Intelligence Manager course.

EXAM FORMAT

The written exam (single choice) takes 1 hour.

CERTIFICATE

Artificial Intelligence Manager according to ISO/IEC 42001

CERTIFICATE VALIDITY 3 years

RENEWAL CRITERIA

One CIS further training event (refresher) within 3 years

DATES

Vienna	21.04.2027
Vienna	29.09.2027
Vienna	01.12.2027

DATA PROTECTION MANAGER ACCORDING TO ISO 27701

JOB PROFILE

Meet the requirements of the GDPR effectively and in a future-proof way: with ISO 27701 **you establish a powerful data protection management system (DPMS)** that not only covers the technical and organisational measures required by law under Art. 32 GDPR, but is also certifiable.

TRAINING OBJECTIVE: The training provides, in a practical way, the skills needed to set up a certifiable data protection management system based on ISO 27701.

The participation fee for the course including exam and certificate is € 990 (excl. 20 % VAT).
Contact us at trainings@cis-cert.com

Data Protection Manager

COURSE

With the new version of ISO 27701, the DPMS can be certified independently of ISO 27001. The course requires knowledge of the GDPR and its requirements and shows efficient ways to set up a certifiable data protection management system (DPMS) based on ISO 27701.

TARGET GROUP

Data protection officers, AI managers, compliance officers, interested parties

CONTENTS

The one-day workshop provides certified data protection officers with structured expertise in compact form, enabling them to correctly classify and apply ISO 27701 in their own company or public authority. The focus is on setting up and operating a data protection management system (DPMS) and on the specific mapping to the GDPR.

Participants get to know the ISO family of standards and the High-Level Structure principle as a basis, work through all relevant chapters of the standard and apply the control catalogues to their own practice.

The training is aimed at data protection officers with prior knowledge of the GDPR who want to integrate ISO 27701 into existing compliance structures on a sound professional basis.

- Module 1 – ISO family of standards and High-Level Structure (HLS/PDCA principle)
- Module 2 – ISO 27701 at a glance: structure, scope and relationship to the GDPR and ISO 27001
- Module 3 – DPMS set-up and operation: context, leadership, planning, support, operational implementation (chapters 4–8)
- Module 4 – Performance evaluation, improvement and GDPR mapping
- Module 5 – Annexes A & B: control catalogues for controllers and processors

DATES to be announced.
Further information is available at www.cis-cert.com/trainings.

EXAM Data Protection Manager

COURSE EXAM

Following the course, the exam for Data Protection Manager according to ISO 27701 takes place.

EXAM FORMAT

The written exam (single choice) takes 1 hour.

PREREQUISITES

At least 2 years of professional experience in data protection or corresponding training (e.g. basic legal training, data protection officer)

CERTIFICATE **Data Protection Manager (ISO 27701)**

CERTIFICATE VALIDITY 3 years

RENEWAL CRITERIA

- One CIS further training event (refresher) within 3 years

AUDITOR TRAINING PROGRAMMES

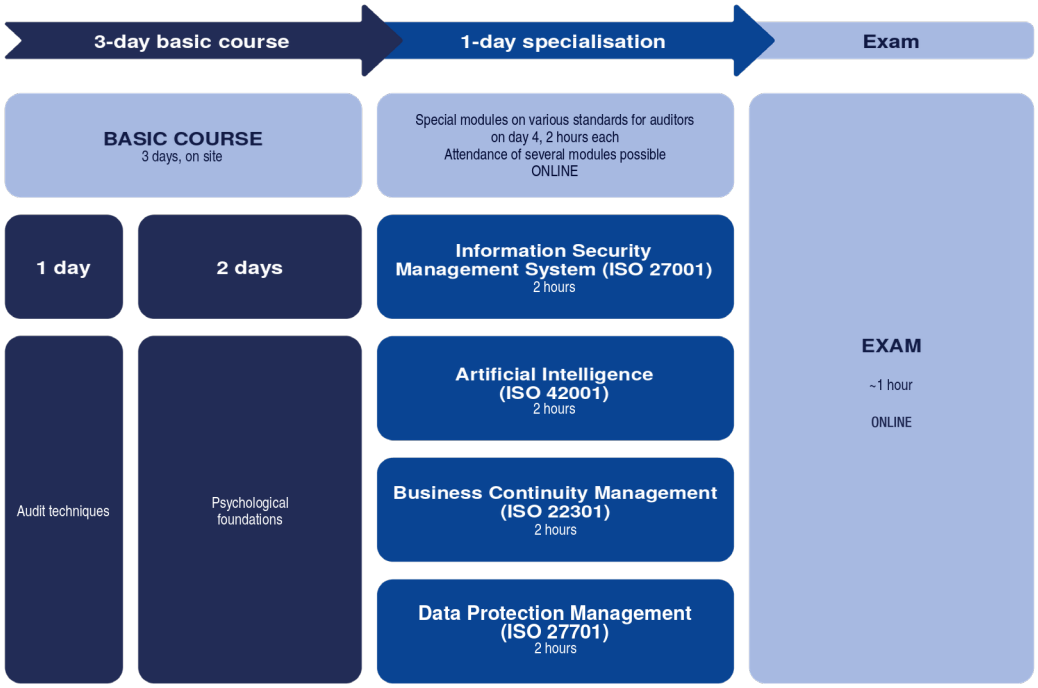

ARTIFICIAL INTELLIGENCE AUDITOR according to ISO 42001
BUSINESS CONTINUITY AUDITOR according to ISO 22301
DATA PROTECTION AUDITOR according to ISO 27701
INFORMATION SECURITY AUDITOR according to ISO 27001

TRAINING OBJECTIVE: After attending one of these course series, you will be able to plan and conduct internal as well as external audits and analyse their results. You will identify any weaknesses and potential for improvement and be able to assess them. You will also master the basic rules of communication in theory and practice and be able to think in terms of system interrelationships.

MODULAR EXTENSION

After the 3-day basic course, you attend the selected specialisation module(s) on information security management systems, Artificial Intelligence, Business Continuity Management and Data Protection, and conclude with the respective certification exam.

Note: Please observe the respective admission requirements for the exam – if you do not meet them at the time of the exam, you can still attend the course (incl. specialisation module) and receive a certificate of attendance.

QUESTIONS?
WE ARE HAPPY TO HELP!

trainings@cis-cert.com
Salztorgasse 2/3/7
1010 Vienna, Austria
Tel.: +43 1 532 98 90

PARTICIPATION FEE for the entire course series including exam and certificate: 3-day basic course +
- 1 specialisation: € 3,690 (excl. 20 % VAT)
- 2 specialisations: € 3,890 (excl. 20 % VAT)
- 3 specialisations: € 4,090 (excl. 20 % VAT)
- 4 specialisations: € 4,290 (excl. 20 % VAT)

Audit techniques: internal audits as a powerful instrument for system improvement

COURSE

The entire practice of conducting internal and external audits is the content of this course. It also covers the different types of audit for different types of organisations as well as the various work steps: preparing the audit, applying the audit questions, preliminary review, on-site audit, audit analysis (with methods) and preparing the audit report. Another important focus is determining corrective and improvement measures. The theory is put into practice using realistic case studies.

DATES 09:00–17:00 each day

Vienna	08.03.2027
Vienna	31.05.2027
Vienna	20.09.2027
Vienna	22.11.2027

Psychological foundations: between auditor and developer. Thinking systemically, communicating effectively.

COURSE

Auditors face a twofold challenge during an audit: on the one hand, they have to act as expert examiners, on the other hand as forward-looking development agents. Auditors are in contact with top management as well as with operational management. In addition to specialist knowledge, auditors need a high level of social competence, the ability to think in networks and to recognise cross-departmental system interrelationships, as well as insights into the basic rules of communication.

DATES 09:00–17:00 each day

Vienna	09. – 10.03.2027
Vienna	01. – 02.06.2027
Vienna	21. – 22.09.2027
Vienna	23. – 24.11.2027

Specialisation modules for ISO/IEC 27001 (Information Security Auditor), ISO/IEC 42001 (Artificial Intelligence Auditor), ISO 22301 (Business Continuity Auditor) and/or ISO/IEC 27701 (Data Protection Auditor)

COURSE

Building on the knowledge of the ISO standard acquired in the respective manager course and the content of the courses “Audit techniques” and “Psychological foundations”, this module specifically addresses the requirements for conducting audits of the respective management system.

DATES 2 hours each

virtual	11.03.2027

EXAM Information Security Auditor / Artificial Intelligence Auditor / Business Continuity Auditor / Data Protection Auditor

COURSE EXAM

The exam content relates to the basic course and the specialisation modules attended.

PREREQUISITES

- Valid manager certificate for the selected specialisation
- Proof of 2 years of professional experience within the last 3 years in information security management or depending on the specialisation (Artificial Intelligence, Business Continuity Management, Data Protection).
- 4 audits conducted/accompanied with at least 15 audit days in information security management or depending on the specialisation (Artificial Intelligence, Business Continuity Management or Data Protection).

EXAM FORMAT

The written exam (single choice) takes ~1 hour (depending on the number of specialisation modules booked).

ACCREDITED CERTIFICATE

Information Security Auditor according to ISO 27001 (if proof of practical experience is missing, with the suffix “Candidate”)

CERTIFICATE

Business Continuity Auditor according to ISO 22301 (if proof of practical experience is missing, with the suffix “Candidate”) or
Artificial Intelligence Auditor according to ISO/IEC 42001 (if proof of practical experience is missing, with the suffix “Candidate”) or
Data Protection Auditor according to ISO 27701 (if proof of practical experience is missing, with the suffix “Candidate”)

CERTIFICATE VALIDITY 3 years

RENEWAL CRITERIA

- Proof of 2 years of professional experience in information security management or, depending on the specialisation, in Artificial Intelligence, Business Continuity Management or Data Protection within the last 3 years
- Proof of 4 audits conducted with at least 15 audit days in information security management or, depending on the specialisation, in Artificial Intelligence, Business Continuity Management or Data Protection
- One CIS further training event (refresher) within the last 3 years

Please note that certificates with the status “Candidate” **cannot** be renewed.

FURTHER TRAININGS

Independent NIS auditor: legal and practical aspects of an NIS audit

COURSE

As a graduate of this course, you understand the legal structure and the foundations of an NISG26 audit and can carry out NISG26-compliant audits independently. You can establish the connection between the legal requirements, information security, audit procedures and the audit report.

TARGET GROUP

CISOs, IT auditors, internal audit and NIS consultants who want to prepare optimally for or conduct an NIS audit.

CONTENTS

- Building knowledge of current legal foundations (NISG 2026, CRA)
- Product and organisational law (supplier management)
- Correct handling of suppliers (internal and external) – CRA
- Conducting audits (taught using a practical audit)
- Preparing a legally compliant audit report
- Official procedure process
- Audit procedure – tips straight from audit practice
- Further frameworks for meeting NISG 2026 (state of the art)
- Using synergies with ISO 27001 for NISG audits

EXAM

Following the course, the exam to become an independent NIS auditor takes place.
Duration: 1 hour

PREREQUISITES

At least 2 years of professional experience in cybersecurity and/or the legal field

COSTS € 3,290 (excl. 20 % VAT)

DATES to be announced.
Further information is available at www.cis-cert.com/trainings.

ISO 27001 & NIS-2 Training: the structured introduction to EU cybersecurity

COURSE

As a graduate of this course, you know the processes and standard requirements for implementing ISO 27001 and ISO 27002 and can apply them in practice.

The fundamentals of information security as well as overarching aspects such as organisation, technology and process management are covered. Using case studies, participants are guided towards independently implementing what they have learned. In addition, the standard is compared with other approaches to information security, and possible further developments of the standard itself and of the series of standards are discussed.

This seminar also teaches the central foundations of NIS-2 and shows in a practical way how organisations can implement the requirements efficiently and sustainably. The focus is on the core measures of NIS-2, the ENISA risk management approach and the central obligations for “essential” and “important” entities.

COSTS € 3,490 (excl. 20 % VAT)

DATES 09:00–17:00 each day

Vienna	22. – 24.03.2027
Vienna	06. – 08.12.2027

NIS-2 fundamentals seminar – compact, practical, ENISA-compliant

SEMINAR

The new NIS-2 Directive presents companies with far-reaching challenges in the areas of cybersecurity, governance and compliance. This seminar teaches the central foundations of NIS-2 and shows in a practical way how organisations can implement the requirements efficiently and sustainably.

The focus is on the core measures of NIS-2, the ENISA risk management approach and the central obligations for “essential” and “important” entities.
Participants receive a clearly structured overview of:

- the regulatory requirements and implementation deadlines
- risk management and security measures according to ENISA best practices
- incident reporting, liability and governance requirements
- practical steps to prepare for audits and inspections

The seminar is aimed at managers, IT managers, compliance officers and organisations that want to prepare for the requirements of the NIS-2 Directive in a compact and comprehensible way.

COSTS € 990 (excl. 20 % VAT)

DATES 09:00–17:00 each day

Vienna	12.04.2027
Vienna	30.09.2027

NIS-2 Management Training

For executives such as managing directors, owners and those responsible for risk, the European NIS-2 Directive not only brings an increased liability risk, but also the legal obligation to undergo further training in cybersecurity.
We offer this tailor-made training with experts from practice in order to convey the most important core content and action points to you concisely and on an equal footing.

COSTS € 4,100 per company (excl. 20 % VAT)

DATES on request

Note: This training is offered as an in-house training.

Compact course on conflict management: information security under tension

In this one-day seminar, participants learn effective conflict resolution strategies that they can apply immediately in their working environment.

CONTENTS

- Personal conflict style, personal conflict biography
- Shaping of individual and social conflict behaviour (personal competence, professional attitude and understanding of roles)
- Working on personal conflict scenarios
- Strategies for dealing with conflicts

PARTICIPATION FEE € 990 (excl. 20 % VAT)

DATES 09:00–17:00 each day

Vienna	14.04.2027
Vienna	20.10.2027

Note: Workshop participants have the option of further individual coaching at reduced coaching rates.

Compact course on data protection

Within one day, you will learn practical examples from one of the most renowned data protection officers in the country that you can apply immediately in your company. This strengthens data protection in your company and your position as an expert who integrates new trends into business processes with foresight.

PARTICIPATION FEE € 990 (excl. 20 % VAT)

DATES on request

Special training: ISO 27001 and cyber security for software developers

This individual special training teaches participants the fundamentals of the ISO 27001/ISO 27002 standards – the foundations of modern information security management systems.

COSTS € 7,910 (excl. 20 % VAT)

DATES on request

Note: This training is offered as an in-house training.
